

Internet es el poema más grande jamás escrito. Ilegible, debido a su tamaño.

Aujourd'hui nous lisons plus que jamais, mais différemment, de façons que nous n'aurions pas définies comme « lire » auparavant.

Maintenant qu'on a plagié tout le monde, tout ce qu'il reste à faire est de se plagier soi-même.

prepostprint.org

curious zine made by euji, martin, natalia and julien, with precious even involuntary contributions by kenneth g., briar l., david g., elisée r., grum999, aaron s., april g., étienne d.l.b., mckenzie w., charles s., henry m., pierre k., eric g.m. and many more.

Le sérieux est obsolète.

Le futur de la lecture, c'est de ne pas lire.

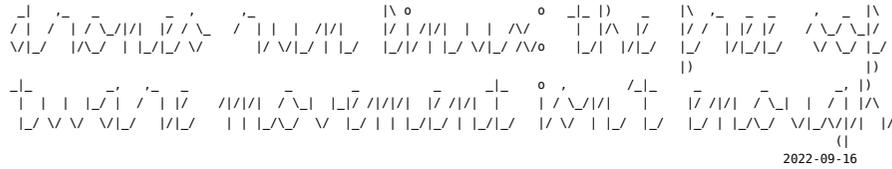

« Le plagiat est nécessaire », insistait Lautréamont. « Le progrès l'implique. »

pppirates – 04-04-2025

Les artistes posent des questions, et ils ne donnent pas de réponses.

Tout matériau est, en principe, utilisable par tout le monde. Même sans remerciements, même sans les préoccupations de la propriété littéraire.

a printer, a lab, and an actual hobbit with an insane dream

richard stallman. rms. if you've spent time in tech, you may know his name. in popular tabloid culture, he's painted as a sexist pedo - in 4chan-esque dungeons, he's heralded as a savior.

benefits, which were responsible for the absolute dominance of things like gcc, the gnu coreutils, and linux - have been hopelessly devoured. all they had to do was strip away the pesky moral movement that all of these efficiency gains carried with it - and voila. money.

thinkpads that can barely manage a youtube video. why should my grandma learn about linux? i bought her an ipad, and she understands it. her eyes are going. linux is not accessible. she's happier and more connected to her family because of it.

in reality, he's a very flawed human that discovered something most of us never will. a single cause to commit the rest of his entire life to.

most people who make open source software have probably never heard of stallman or the free software movement.

i refused to use discord for years - but instead of furthering freedom, i hurt myself. the severance of many meaningful relationships. most of my old friends simply moved on without me. if you don't have vocal chords, people forget that you exist.

rms has led the free software movement for 40 years. his asset is his flaw. he is stubborn. extremely stubborn. absolutely unwilling to deviate, admit fault, change, or back down. a staunch revolutionary on a blazing battleground. the world will see free software as a moral right, and he will die fighting, no matter what anyone says.

all that remains is bootcamps, github, obscured javascript, and companies trying to save as much money as possible by paying_nobody_ to produce the software that they make millions from. and why not? it's free.

you might say they probably weren't real friends if they forgot about me so easily. but they were real to me. try it yourself, and see what happens.

snakes in the hobbits den

i believe that the free software movement is over, and that it has been over for years. all that remains are a few men with grey beards, tattered war drums, and a long line of allegations.

ultimately, my stubborn resistance made no difference.

but stallman is an old man now. the world moved on without him. he beats the same war drum, but nobody is listening. groups of capital formed, and two libertarians started the open source movement[1] as a corporate-friendly free software alternative.

and god. we tried.

most people don't care about the free software movement. the benefits are vague, and the consequences are life-changing. you lose touch with friends and family. it takes a lot more time and energy to navigate. to bank. to find restaurants or activities, looking at things to buy, tracking your calendar. doing your taxes. living.

and they won.

i thought i heard a plane, crashing but now i think it was your passioning snapp ing

eventually, you will realize that it's not worth it. you'll start using software that eases your life, and you'll question whether all of this denial was worth it.

and won. and won. and won and won and fucking won. the accidental benefits of the free software movement: a global community working asynchronously, sharing code without pay. these important, critical

using non-free software is not a personal failing. we only have so much time, and it tick-tick-ticks.

i cancelled my FSF membership, after 10 years of faithful support.

all of that fighting
all of that denial, resisting temptation.
war drums, freedom,
coding, sharing,
friends, love,

after all of that,
after everything,

predator drones

Nothing2Hide"

<https://wiki.nothing2hide.org/doku.php?id=protectionnumerique:start>

What's the difference between piracy and fair use? Piracy ?

* you're poor, can't pay for all the shiny movies you want to watch, the good music you want to listen, the marvelous books you want to read and not available in libraries (because Trump&Co. burnt them) * you illegally download a couple of them * you even didn't had the time to watch/listen/read them * => you're a f*cking criminal, because of you, the major won't be able to make as much as billion dollars of benefits as they want: go to jail and pay a hefty fine

Fair use ?

* you're insanely rich, like so much billions, you can literally buy some countries * you illegally download hundred of thousand (if not thousand of thousand) of them * you make it plagiarism and counterfeit that you can now sell for a high price * => you're in a fair use case because you know, you need to do it before the Chinese do it otherwise they will make billions in place of you and it wouldn't be fair: get the law being adapted to your case and get a publicly funded subsidy

How can we integrate permacomputing into publishing? We both organised it but for that reason we also missed a lot.

Secrètement, ce que les gens ont le plus détesté dans l'impression d'Internet était son aspect démocratique, que n'importe qui puisse devenir un artiste en faisant simplement Ctrl + P.

Si on imprimait Internet, il faudrait sacrifier 40 000 arbres, presque deux fois le nombre d'arbres de Central Park.

Auto-tunez votre prochain recueil de poèmes.

5 Il est possible d'être à la fois inauthentique et sincère.
