2 Répétez après moi : « je suis un pirate ».

a printer, a lab, and an actual hobbit
with an insane dream

richard stallman. rms. if you've
spent time in tech, you may know
his name. in popular tabloid culture,
he's painted as a sexist pedo - in
4chan-esque dungeons, he's heralded as
a savior.

in reality, he's a very flawed human
that discovered something most of us
never will. a single cause to commit
the rest of his entire life to.

rms has led the free software movement
for 40 years. his asset is his flaw.
he is stubborn. extremely stubborn.
absolutely unwilling to deviate, admit
fault, change, or back down. a
staunch revolutionary on a blazing
battleground. the world will see free
software as a moral right, and he will
die fighting, no matter what anyone
says.

snakes in the hobbits den

but stallman is an old man now.
the world moved on without him.
he beats the same war drum, but
nobody is listening. groups of
capital formed, and two libertarians
started the open source movement[1]
as a corporate-friendly free software
alternative.

and they won.

and won. and won. and won and won
and fucking won. the accidental
benefits of the free software
movement: a global community working
asynchronously, sharing code without
pay. these important, critical

benefits, which were responsible for
the absolute dominance of things like
gcc, the gnu coreutils, and linux -
have been hopelessly devoured. all
they had to do was strip away the
pesky moral movement that all of these
efficiency gains carried with it - and
voilà. money.

most people who make open source
software have probably never heard
of stallman or the free software
movement.

all that remains is bootcamps, github,
obscured javascript, and companies
trying to save as much money as
possible by paying nobody to produce
the software that they make millions
from. and why not? it's free.

i believe that the free software
movement is over, and that it has been
over for years. all that remains are
a few men with grey beards, tattered war
drums, and a long line of allegations.

at the end of the day, the free
software movement was colonized. and
we tried to save it.

and god. we tried.

i thought i heard a plane, crashing
but now i think it was your passionate
snapp ing

using non-free software is not a
personal failing. we only have so much
time, and it tick-tick-ticks.

i cancelled my FSF membership, after
nobody wants to use 10 year old
10 years of faithful support.

all of that fighting
all of that denial, resisting temptation.
war drums, freedom,
coding, sharing,
friends, love,

after all of that,
after everything,

Que l'autorité puisse procéder du consentement de ceux qui s'y pliaient plutôt que d'être conférée par une puissance supérieure, voilà, très probablement, l'une des expériences des équipages des vaisseaux pirates dans les premiers temps du monde atlantique moderne. Non seulement les équipages pirates élistaient leurs capitaines, mais il y existait des contre-pouvoirs (sous forme du quartier-maître ou d'un conseil de navire) et des relations contractuelles entre l'individu et la collectivité (sous forme d'articles écrits réglementant le partage du butin et les indemnités compensatoires pour les accidents du travail). We take a resolutely political approach to the use of digital technologies. We recognize the toxicity of most of their ecosystems. We understand the mechanics of oppression that underlie them and that they perpetuate. Nous sommes conscient.es des processus extractivistes et colonialistes sur lesquels elles prospèrent et nous y opposons.

We think W3C is a big organisation but actually the CSS working group is just a few people. Dave was actually very alone to write these specifications.

we wrapped up saying that:

Les interfaces graphiques simplifient notre communication avec les machines. Elles remplacent l'écriture d'une langue artificielle (ex le langage de commande) par des interactions gestuelles. Sans s'en rendre compte, nous parlons un langage à travers nos gestes. Sans le savoir, nous avons acquis la maîtrise d'un langage universel qui nous permet de converser avec nos objets informatiques.
