Un poète contemporain est quelqu'un qui n'écrit pas de poèmes.

Ecouter de la musique est devenu de la littérature, nécessitant de taper au clavier et de trier ; nous sélectionnons ce que nous écoutons à partir de mots clé.

Maintenant qu'on a plagié tout le monde, tout ce qu'il reste à faire est de se plagier soi-même.

a printer, a lab, and an actual hobbit
with an insane dream

richard stallman. rms. if you've spent time in tech, you may know his name. in popular tabloid culture, he's painted as a sexist pedo - in 4chan-esque dungeons, he's heralded as a savior.

in reality, he's a very flawed human that discovered something most of us never will. a single cause to commit the rest of his entire life to.

rms has led the free software movement for 40 years. his asset is his flaw. he is stubborn. extremely stubborn. absolutely unwilling to deviate, admit fault, change, or back down. a staunch revolutionary on a blazing battleground. the world will see free software as a moral right, and he will die fighting, no matter what anyone says.

snakes in the hobbits den

but stallman is an old man now. the world moved on without him. he beats the same war drum, but nobody is listening. groups of capital formed, and two libertarians started the open source movement[1] as a corporate-friendly free software alternative.

and they won.

and won. and won. and won and won and fucking won. the accidental benefits of the free software movement: a global community working asynchronously, sharing code without pay. these important, critical

benefits, which were responsible for the absolute dominance of things like gcc, the gnu coreutils, and linux - have been hopelessly devoured. all they had to do was strip away the pesky moral movement that all of these efficiency gains carried with it - and voila. money.

most people who make open source software have probably never heard of stallman or the free software movement.

all that remains is bootcamps, github, obscured javascript, and companies trying to save as much money as possible by paying nobody to produce the software that they make millions from. and why not? it's free.

i believe that the free software movement is over, and that it has been over for years. all that remains are a few men with grey beards, tattered war drums, and a long line of allegations.

at the end of the day, the free software movement was colonized. and we tried to save it.

and god. we tried.

i thought i heard a plane, crashing but now i think it was your passioning snapp ing

using non-free software is not a personal failing. we only have so much time, and it tick-tick-ticks.

nobody wants to use 10 year old

thinkpads that can barely manage a youtube video. why should my grandma learn about linux? i bought her an ipad, and she understands it. her eyes are going. linux is not accessible. she's happier and more connected to her family because of it.

i refused to use discord for years - but instead of furthering freedom, i hurt myself. the severance of many meaningful relationships. most of my old friends simply moved on without me. if you don't have vocal chords, people forget that you exist.

you might say they probably weren't real friends if they forgot about me so easily. but they were real to me. try it yourself, and see what happens.

ultimately, my stubborn resistance made no difference.

most people don't care about the free software movement. the benefits are vague, and the consequences are life-changing. you lose touch with friends and family. it takes a lot more time and energy to navigate. to bank. to find restaurants or activities, looking at things to buy. tracking your calendar. doing your taxes. living.

eventually, you will realize that it's not worth it. you'll start using software that eases your life, and you'll question whether all of this denial was worth it.

i cancelled my FSF membership, after 10 years of faithful support.

after everything,

Nous n'acceptons pas de vérité promulguée : nous la faisons nôtre d'abord par l'étude et par la discussion et nous apprenons à rejeter l'erreur, fut-elle mille fois estampillée et patentée. Que de fois, en effet, le peuple ignorant a-t-il dû reconnaître que ses savants éducateurs n'avaient d'autre science à lui enseigner que celle de marcher paisiblement et joyeusement à l'abattoir, comme ce boeuf des fêtes que l'on couronne de guirlandes en papier doré.

We share some common values rooted dans l'anti-capitalisme, le trans*feminisme, les enjeux écologiques, l'anti-fascisme, and the hope that we can help address these issues together, PrePostPrint prenant part humblement à un ensemble de mouvements souterrains, alternatifs, divergents, et que nous souhaitons vivifiants.

We take a resolutely political approach to the use of digital technologies. We recognize the toxicity of most of their ecosystems. We understand the mechanics of oppression that underlie them and that they perpetuate. Nous sommes conscient·es des processus extractivistes et colonialistes sur lesquels elles prospèrent et nous y opposons.

We're no more neo-Luddites than we are technophiles, recognizing the singular beauties of matter and light alike. We're at the heart of the processes by which print and digital meet and interpenetrate. From fanzines to samizdats, autonomous websites to collective wikis, we like to explore ways of sharing ideas and feelings.
