a printer, a lab, and an actual hobbit
with an insane dream

richard stallman. rms. if you've
spent time in tech, you may know
his name. in popular tabloid culture,
he's painted as a sexist pedo - in
4chan-esque dungeons, he's heralded as
a savior.

in reality, he's a very flawed human
that discovered something most of us
never will. a single cause to commit
the rest of his entire life to.

rms has led the free software movement
for 40 years. his asset is his flaw.
he is stubborn. extremely stubborn.
absolutely unwilling to deviate, admit
fault, change, or back down. a
staunch revolutionary on a blazing
battleground. the world will see free
software as a moral right, and he will
die fighting, no matter what anyone
says.

snakes in the hobbits den

but stallman is an old man now.
the world moved on without him.
he beats the same war drum, but
nobody is listening. groups of
capital formed, and two libertarians
started the open source movement[1]
as a corporate-friendly free software
alternative.

and they won.

and won. and won. and won and won
and fucking won. the accidental
benefits of the free software
movement: a global community working
asynchronously, sharing code without
pay. these important, critical

benefits, which were responsible for
the absolute dominance of things like
gcc, the gnu coreutils, and linux -
have been hopelessly devoured. all
they had to do was strip away the
pesky moral movement that all of these
efficiency gains carried with it - and
voilà. money.

most people who make open source
software have probably never heard
of stallman or the free software
movement.

all that remains is bootcamps, github,
obscured javascript, and companies
trying to save as much money as
possible by paying nobody to produce
the software that they make millions
from. and why not? it's free.

i believe that the free software
movement is over, and that it has been
over for years. all that remains are a
few men with grey beards, tattered war
drums, and a long line of allegations.

at the end of the day, the free
software movement was colonized. and
we tried to save it.

and god. we tried.

i thought i heard a plane, crashing
but now i think it was your passionate
snapp ing

using non-free software is not a
personal failing. we only have so much
time, and it tick-tick-ticks.

nobody wants to use 10 year old

thinkpads that can barely manage a
youtube video. why should my grandma
learn about linux? i bought her an
ipad, and she understands it. her eyes
are going. linux is not accessible.
she's happier and more connected to
her family because of it.

i refused to use discord for years -
but instead of furthering freedom, i
hurt myself. the severance of many
meaningful relationships. most of my
old friends simply moved on without
me. if you don't have vocal chords,
people forget that you exist.

you might say they probably weren't
real friends if they forgot about me
so easily. but they were real to me.
try it yourself, and see what happens.

ultimately, my stubborn resistance
made no difference.

most people don't care about the
free software movement. the benefits
are vague, and the consequences are
life-changing. you lose touch with
friends and family. it takes a lot
more time and energy to navigate.
to bank. to find restaurants or
activities, looking at things to buy.
tracking your calendar. doing your
taxes. living.

eventually, you will realize that it's
not worth it. you'll start using
software that eases your life, and
you'll question whether all of this
denial was worth it.

i cancelled my FSF membership, after
10 years of faithful support.

after all of that,

after everything,
